fall short of \$500,000, which is of great importance to Texas at this time. 'Tis said in the last engagement, Col. Milan and 40 others were killed, and 15 wounded. I hope our friends in the United States will continue to send us their aid, inasmuch as we have to maintain the ground on the other side of the Rubicon. Generals Cos and Agoether were taken prisoners. It is supposed that the prisoners will be carried to Nagodoches and St. Augustine, as they were taken without any stipulations on their part. The first attack was led by Col. Milan, to whom much is due for the success of the battle.

CHERAW GAZETTE

TUESDAY, JANUARY 19, 1836.

We have complaints from different quarters by persons who put their names to subscription papers for the Cheraw Gazette, that the paper has not been sent to them. The reason is that the subscription papers have not been returned to us. We hope persons still holding any with names to them, will be good enough to return them without delay.

We have received a report of Congressional proceedings down to the 13th, but not in time for this week's paper. Nothing very important has been done. In the House the debate on the abo. lition question was postponed, but has, no doubt, before this been resumed. A debate arose in the Senate on the same subject on the 7th, which consumed the day. The question was one made by Mr. Calhoun, whether or not a petition from Ohio for abolition in the District of Columbia should be received. The principal Speakers were Messrs. Calhoun, Porter, and Preston. The question was again moved on the 11th and the matter laid on the table. The Southern Members are determined to obtain a decided expression of the epinion of both Houses on the subject. No better time can ever arrive for it. But one member. Mr. Slade, of the House, has yet made an abolition speech. Ex President Adams has threat. ened to make one, if the members from the slave. holding States would not evince a fear of meeting the question by letting the subject pass without de-

We are glad to see among the proceedings of the Senate the following resolutions offered by Mr. Clay, on the 11th nst. and adopted on the heat day :

Resolved. That the President be requested to communicate to the Senate (if it be not, in his oinion, incompatible with the public interest) whether, since the termination of the last Congress, an overture, formal or informal, official or unofficial, has been made by the French Government to the Executive of the United States, to accommodate the difficulties between the two Governments respecting the execution of the treaty of 4th July, 1831; and particularly whether a despatch from the Duc de Broglie, the French Minister of Foreign Affairs, to the French Charge d'Affaires at Washington, was read, and a copy of it furnished by him to the Secretary of State, for the purpose of indicating a mode by which these difficulties might be removed.

Rescived, also, under the resolution above mentioned, in the event of any such overture having been made. That the President be requested to inform the Senate what answer was given to it; and that he be further requested to communicate a copy of it to the Senate.

It has been stated on credible testimony that an overture such as that referred to in these resolutions had been made to the President before he transmitted his message to Congress at the openthe character of the President and the nation to settle the truth of the rumor.

Mr. Barton, our late Charge d'Affaires at Paris, has returned home, and Mr. Pegcot has taken his departure from Washington. All diplomatic correspondence between the two nations is thus cut off. But we still hope that war may and will be avoided.

We have received the January number of this valuable periodical. It contains an unusual variety of interesting matter in its department.-This is the first No. issued under the management of its new Editor, B. R. Carrol, Esq., and contains ample evidence of his fitness for the task which he has undertaken. The Columbia Telescope says: "We confidently predict that his labors will elevate the usefulness of the publication." For want of room we reluctantly postpone the introductory address of the Editor till next week. The following is the table of contents of the present number.

Insurrection. Lynching .- It appears from a letter published in the National Intelligencer, dated N. Orleans, Dec. 29, that an insurrection of negroes was detected at Jackson, Feliciana county, Lou., on Christmas eve. Upwards of 40 slaves were found in arms, among them favorite confidential servants of families. Great commotion was of course produced in the surrounding country. Two white men, one an overseer and the other an abolitionist, were partakers in the insurrection, and were both hanged, on Saturday

We hear loud complaints from every quarter of extraordinary irregularity in the mails. The public want accommodation in this department, as we'll as retrenchment of expenses. We give a single instance of irregularity. The mail from Louisville to Cincinnati is carried by steam boats, and passes thro' no intervening Post Office. Yet we learn from the Cincinnati Whig that lately two successive weeks had passed during which not a single number of the Louisville Journal had been received at the office of that paper, although the journal, which is a daily paper, had been regularly deposited in the Louisville Post Office. The Editor of the Journal is pretty angry on the subject. We would let our readers see how he speaks, fortunately no other injury was done. but that he uses harsher language than we are accustomed to admit into our columns. THE SILK CULTURIST. THE Executive Committee of the Hartford

County Silk Society, have commenced a monthly publication, called the Silk Culturist and Farmer's Manual. The object of the publication is to disseminate a thorough knowledge of the cultivation of the

Mulberry Tree, in all its varieties—the rearing of Silk Worms—the production of Cocoons, and the reeling of Silk, in the most approved method. The importance of this knowledge will appear from the fact that the nett profits of land devoted to the culture of Silk, is double, if not triple to that derived from any crop which can be put upon it. It is also a fact, that every farmer can raise several hundred dollars worth of silk, without interfering with his ordinary agricultural operations. But in order to avail himself of this facility to gain competency and wealth, which our soil and climate have given him, he must possess himself of information on the subject-for without it his attempts will be fruitless. It is, therefore, the object of the Committee to diffuse this information as extensively as possible, and at the cheapest rate. The publication will contain a complete manual or directory from sowing the seed to reeling the Silk, together with such facts and experiments, as will enable farmers to raise Silk, and prepare it for market, without further knowledge or assistance. It will also contain interesting matter on agricultural subjects in

CAREY'S LIBRARY

CHOICE LITERATURE.

WHEN this work was about commencing, the Proprietors, in their Original Prospectus, stated, that their facilities were very great for conducting a publication of the kind. The selections already have given great a isfaction.
"The Life of Sir James Mackintesh," "Kincaid's Rifle Brigade," and "Characteristics of Hindostau," are works that at the same time are interesting and instructive. Nothing bearing a different character shall ever find a place in the

Library.

As a proof of our facilities, we have commenced in No. 14, the publication of a work of History and Fiction, by James—received by us one month in advance of any other Publisher. This gentleman is the author of those deservedly popular works, "Darnley," "D'Lorme," "Richelieu," "Phil ip Augustus," "Henry Masterton," "John Marston Hall," "Mary of Burgundy," "Tho Gypsy," &c. The present work will sustain his high reputation. The scene is laid in France, during the reign of its gayest monarch, Henri during the reign of its gayest monarch, Henri Quartre, and is full of those beautiful descriptions and stirring incidents which characterize his writinns. It is entitled
